Vinícius Borghetti Kerwald (He/Him)

Bachelor of Computer Science

Senior Analyst/Full Stack .NET Developer
Self-employed

ABOUT ME

I have a bachelor's degree in Computer Science from UCS - University of Caxias do Sul and I am a technology fanatic, especially information technology. I decided to start my career in commercial systems development. For approximately 14 years, I worked as a developer in the main technology companies in the city where I live. During this period I had contact with several technologies. 10 years ago I founded MISA IT Solutions, with the aim of acting as a software factory. Currently, the company develops customized systems for several clients in its region. Its mission is to use the most current technologies on the market to develop quality and efficient systems. Its focus is on working to increase the competitiveness of its clients in the market, looking for the most promising technologies, as well as creative and disruptive ideas.

LAST EDUCATIONAL TRAINING

2/2000 – 1/2010   **Bachelor of Computer Science**
UCS – University of Caxias do Sul

RECENT COURSES AND CERTIFICATES

7/2020   **LGPD – The new data regulation and the impacts for the industry.** - FIERGS/CIERGS

4/2023   **React Native: Develop Native Apps for Android and iOS.** – ûdemy

LAST PROFESSIONAL EXPERIENCE

3/2014   **FLORENSE FURNITURE FACTORY**

Role   **Senior Analyst/ Full Stack .NET Developer**

Local   **Hybrid**

Activities   The complex production process of custom-made furniture at the largest factory in Brazil brings many challenges on a daily basis. Analyzing the processes, making suggestions or improving the process, suggesting other technologies, coordinating activities, developing and testing the solution are the main activities of my day-to-day. The company daily uses 4 systems that were developed by me. These customized systems comprise several processes, such as user management, positions, goals, products, carriers, customers, projects, project costs, concessions, marketing material, financial control, BI, logistics and integration with other systems.

Technologies   C# e VB .NET, SQL Server, ExtJS, JQuery, HTML 5, CSS, JavaScript, JSON, XML, Fluent (ORM), NHibernate, Entity Framework, Webservices, API, Tortoise SVN, Postman, SOAP UI e Swagger.

HARD SKILLS

Technologies   Java, Delphi, PHP, PROGRESS 4GL, Oracle, MySQL, PostgreSQL, SQLite, Android SDK, Eclipse, Github, Windows and Linux.
