Vinícius Borghetti Kerwald
Bachelor of Computer Science

Senior Analyst/Full Stack .NET Developer
Self-employed

ABOUT ME

In 2000 I joined the Computer Science course. In the early years, I identified myself with programming subjects. So I decided to start my career focusing on systems development. For approximately 14 years, I worked as a developer/analyst in the main companies in my city. During this period, I performed different activities and had contact with various technologies. I completed my training in 2010. In 2014, I decided to test my knowledge and opened my own company, MISA IT Solutions. Currently, my company acts as a software factory, developing quality and efficiency systems for companies in the region. My mission is to work to increase the competitiveness of my clients in the market. I'm a technology fanatic. I like to always be looking for new and promising technologies, ideas and techniques.

PROFESSIONAL EXPERIENCE

Since 2014	**FÁBRICA DE MÓVEIS FLORENSE**
Role	**Senior Analyst/ Full Stack .NET Developer**
Activities	The complex production process of custom-made furniture at the largest factory in Brazil brings many challenges on a daily basis. Analyzing the processes, making suggestions or improving the process, suggesting other technologies, coordinating activities, developing and testing the solution are the main activities of my day-to-day. The company daily uses 4 systems that were developed by me. These customized systems comprise several processes, such as user management, positions, goals, products, carriers, customers, projects, project costs, concessions, marketing material, financial control, BI, logistics and integration with other systems.
Technologies	C# e VB .NET, SQL Server, ExtJS, JQuery, HTML 5, CSS, JavaScript, JSON, XML, Fluent (ORM), NHibernate, Entity Framework, Webservices, API, Tortoise SVN, Postman and SOAP UI.

EDUCATIONAL BACKGROUND

2000 - 2010	**UCS – Universidade de Caxias do Sul**
	Bachelor of Computer Science
